- Testing: Jest, Cypress, React Testing, Webdriverio
- Design: Figma, Photoshop, AdobeXD, Premiere Pro
- DevOps: Azure DevOps, Github Actions, AWS

📁 Work Experience

DevEx Engineer at SAS - Scandinavian Airlines

August 2023 — Present

- Spearheaded the maintenance and enhancement of the organization's development tools, directly impacting over 800 employees by ensuring optimal performance and seamless alignment with development workflows, resulting in a 30% increase in deployment efficiency.
- Led the development and ongoing support of an internal development portal, serving as a pivotal resource for 150+ developers by centralizing access to tools and collaboration, which enhanced productivity by 25%.
- Innovated the development process by introducing and integrating OpsGenie and ChatGPT plugins into the internal portal, improving incident response times by 40% and enabling the seamless integration of AI-powered utilities, benefiting the entire development team.
- Played a key role in elevating the developer experience (DevEx) through the continuous refinement of tools and processes, contributing to a 20% improvement in project delivery times and fostering a more agile and responsive development environment for over 800 employees.

Full Stack Developer at MightyHomes

February 2023 — June 2023

- Collaborated with a startup company to develop and launch a Next.js application that leverages the ControlNet ML model to generate diverse room variations based on user-uploaded photos.
- Played a key role in designing and implementing the AI-powered tool, ensuring seamless integration with the existing development infrastructure and collaborating closely with the development team.
- Contributed to the full software development life cycle, including enhancing core functionalities, refining the user interface, and conducting thorough testing to deliver a high-quality and user-friendly application.

Web App Developer at ContentDrips

2021 — 2022

Details

Jyllandsgatan 138 LGH 1707,
Stockholm, 16447, Sweden,
